Welcome to *the* **Nirvana Club**

Associate Level Membership Available!

Ed Downs
CEO & Founder

When I started Nirvana Systems in 1987, my goal was to automate the trading process. The pursuit of profitable automated trading technology has led me to create many products over the years. But the *byproduct* of this work has been the development of something even more valuable than anything I envisioned back then—the Nirvana Club.

Each year, we have continued to improve our ARM Signal Generation technology, providing better tools and more profitable Strategies for members. And 2010 is proving to be very significant for two important reasons.

This year we improved our Neural Network technology so dramatically that we are beginning to regularly see Strategies that exceed 80% accuracy. This is the first requirement of our Ultimate Trading Machine mission.

The second reason 2010 is a landmark year is, for a limited time, we have opened up a new **Associate Membership** level. It's half the cost of our regular membership, and includes ALL the benefits except the NSP Strategies (which can be acquired later using the Nirvana Club discount.)

Members continually tell me, "*My Nirvana Club membership is the best investment I have ever made.*" And it's easy to see why they say that when you look at all that comes with a membership.

All members get access to our advanced ARM4 technology, making it easier than ever before to create profitable Strategies. You also get our ARM4 Strategies powered by Chart Pattern Recognition.

Additional benefits include Education for Members, access to our active Nirvana Club Community, Product Discounts and Priority Support. And of course, participation in the Ultimate Trading Machine mission.

And, for a limited time, new members also get our powerful T3 Strategies AND OmniTrader Professional with OmniPilot! (See pages 7 and 9.)

The **VALUE** of a Nirvana Club membership is incredible! **And with the new Associate Membership**, all OmniTrader and VisualTrader owners can join the Club at an affordable price.

I decided to open this new level because I want all of our loyal Nirvana customers to join the Club this year. But we are **ONLY** keeping it open for a very small window of time. Read about this special new membership on page 15.

And...Welcome to the Nirvana Club!

Sincerely,

Ed Downs
CEO & Founder
Nirvana Systems, Inc.

ALL ABOARD!

It's 2010—the start of a new decade.

This is the perfect time to regroup, reassess, and prepare for the future. As you engage the markets in 2011 and beyond, you will want all the firepower you can get at your disposal, including great Strategies, savvy traders to collaborate with, and education on how to maximize your profits. And that's precisely what we've built into the Nirvana Club—the Greatest Trading Organization in the World.

A.I. for Traders

Over the next pages, you are going to learn about the significant breakthroughs we have made this year on our Artificial Intelligence technology. With recent improvements to ARM4, we are now able to dramatically improve the accuracy of our Strategies. Read the exciting story on pages 5-7.

Nirvana Club Value

You will also learn about the significant assets we have built up in the Nirvana Club, which have dramatically increased the value of a membership. In addition to ARM4, you get deep discounts on our products, including data. You also gain access to our very active member Forum, trading education webinars, the annual BASH meeting and more.

NEW! Associate Level

With the new Associate Membership Level*, joining the Club is easier and more affordable than ever before. As we start a new decade, let the Club empower YOU to meet your financial goals. Now, more than ever before, is the right time to join the Nirvana Club.

*The Associate Level is only being offered for a limited time. See page 15 for details.

THE ULTIMATE Trading

The Quest for 100% Automated Trading Systems

I started Nirvana Systems to develop a fully automated Trading System—a system so accurate, you could turn it loose to trade the markets or have it alert you by cell phone to interactively place and manage trades. I would call such a system *The Ultimate Trading Machine*.

The “Software Robot”

In 1989 Frank Taucher, author of *The SuperTrader’s Almanac*, conferred his Product of the Year Award to our Software Robot called KLATU. It had the ability to run other software from the outside, just like a person would do. Rather than reinvent the wheel, I decided to harness the analysis power of programs like MetaStock™ and TBSP™. In other words, use these programs to find signals and then automate everything else.

The OmniTrader Project

The only problem was the programs we were automating weren’t powerful enough. We soon realized we were going to have to create our own trading technology. In 1993 we started the OmniTrader project, based on the Adaptive Reasoning Model, or ARM for short.

OmniTrader is a giant leap forward in automated trading technology. I continue to get letters from customers who are amazed at how much it does and how little we charge for it! But this first version of ARM still wasn’t quite powerful enough for a fully automated Trading System.

I was able to run some experiments and concluded that by applying specific market measurements and building rules using a Genetic Algorithm, it should be possible to determine the probability of a given signal being correct based on specific combinations. We just needed resources to devote to the research.

The Nirvana Club is Born

Then an idea occurred to me, “Would our customers be willing to partner with us?” We could create a club, charge a membership fee, and apply the new funding to the development of these advanced trading technologies. The members would receive the products as they were created, and the company would continue on the mission until a fully automated Trading System called The Ultimate Trading Machine was realized.

Since the Club was originally founded, we have enjoyed many successes, with each building on the last. We have applied significant resources to the very difficult problem of finding Trading Systems that consistently beat the market (milestone synopsis presented below). And I am proud of the fact that we are now delivering profitable mechanical Trading Systems to our members.

The Power of ARM

Our ARM technology is second to none in the trading community. As the product has advanced, we have continued to release new and more powerful Strategies to our members. We also provide the same tools we use for our members to experiment with. Many members have taken this technology and either created their own Strategies or significantly enhanced existing ones. Granted, not all members want to do this, but the fact that the tools are open to all 2500+ members means our research can move forward that much faster. We have some very savvy people in the Nirvana Club.

Every year, we work to improve our ARM technology. Last year, we added “Dynamic Training” so our Neural Networks could be trained, validated, and tested over very large amounts of data. This year, we added “Data Mining” (see *A.I. for Traders*, page 6). We have also made many technical advancements, such as the addition of cross-validation network training. The resulting performance gains have been phenomenal!

Nirvana Club is launched and over 300 members joined.

First release of ARM technology.

Nirvana Club Forums allow members to communicate with each other.

Advanced ARM3 Knowledge Bases.

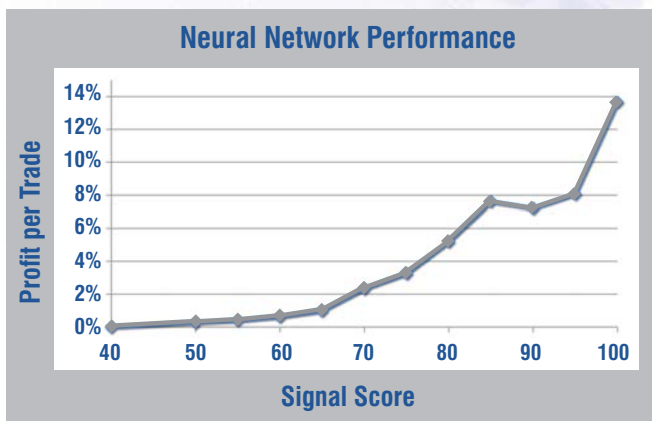

Artificial Intelligence on Chart Patterns.

OmniTrader Integration

ATE ng Machine

Closing in on UTM

In the graph below, we show **Profit per Trade** for various values of **Signal Score** for one of our recently trained Neural Networks, demonstrating the fact that higher Signal Scores generate higher profit! It's a simple matter to tell OmniTrader to only trade signals with the highest scores. Hit rates for the highest score values are above 80%—our first criteria for The Ultimate Trading Machine.

Now is the Time

Members will tell you the Club has significantly exceeded their expectations—not just in terms of trading technology, but in terms of the many additional benefits of membership. I want to encourage you to join while our Associate membership window is open. There has never been a more perfect time to join the Nirvana Club.

For performance statistics, charts, and other information on our recent ARM4 developments, visit www.nirvanasystems.com/nirvanaclub/ARM4.

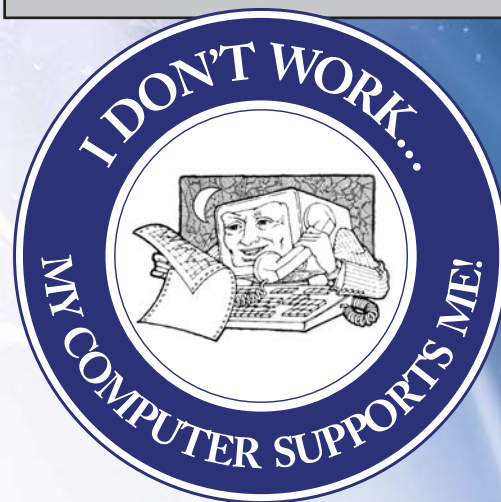

MISSION: POSSIBLE

The Ultimate Trading Machine is defined as a Trading System with 80% accuracy and a Reward:Risk Ratio or "R" of 3:1.* While such performance is not required to make money in the markets, we believe these numbers are achievable through the use of Artificial Intelligence applied to Trading Systems.

When members join the Nirvana Club, they enter into a Nirvana Club Agreement with us. The agreement states that if and when released, the Ultimate Trading Machine will ONLY be made available to Club members. The membership and I look forward to wearing a button that says...

"I don't work.
My computer supports me!"

* In his book, *Trade Your Way to Financial Freedom*, Van K. Tharp defines R as the expected profit divided by the maximum loss. Consistently high R values mean higher profits because losses are kept much smaller than gains.

ARM Technology: Artificial Intelligence

A.I. for Traders!

Artificial Intelligence has been used to improve investment returns in hedge funds and other proprietary trading shops for a number of years. But never before has this kind of technology been available to individual traders.

ARM2 was first released to the Nirvana Club in 1998. Since then the technology has continued to improve year after year, leading up to the ARM4 version members have access to today.

In 2010, we added Data Mining to our Neural Network process, which dramatically improved performance. In some cases we are seeing the profits DOUBLE in our best Strategies! (See article, next page.)

How Does It Work?

As a part of our Nirvana Club research, we developed a Strategy Block called “NN Score.” Members who want to train their own Neural Networks can readily do so, because they have access to the same tools we use (the sidebar, *Improving Strategies with ARM4* to the right explains the process).

But you don't have to do this because we provide pre-trained Networks for our members! Just drop an existing NN Score block into a Strategy and run the ToDo List. In most cases, profit per trade will increase—especially if the signals in the Strategy are similar to the signals that were used to train the Network. This is the case with the Strategies discussed on the next page.

Millions have been invested in the development of ARM4, which is by far the most powerful Artificial Intelligence technology ever created for traders. As a result of recent advances, we are now seeing 80% Hit Rates in many of our Strategies—the first performance goal for The Ultimate Trading Machine.

Improving Strategies with ARM4

We provide *canned* Networks for our Nirvana Club members to use, but since members get the same tools we use, they can also create their own proprietary Strategies. Here is the process:

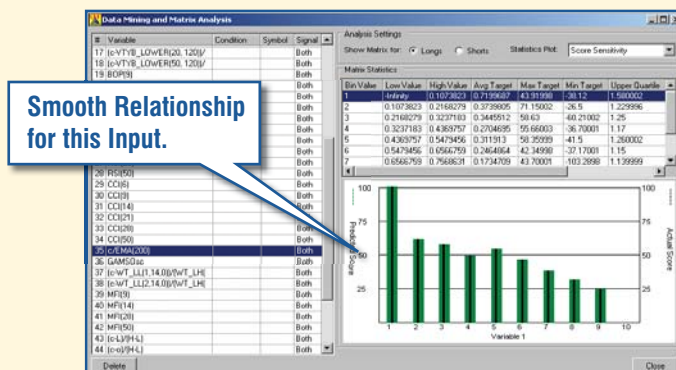

1. Identify Inputs

First, we identify Market Measurements or “Inputs” that we believe will help predict a profitable signal. Here are some examples:

- Existence of Price Gaps
- CCI Indicator
- MACD Histogram Indicator
- DMI Indicator
- Bollinger Bands
- Distance from Moving Averages
- Current Volatility
- Candle Patterns
- Differences in Price

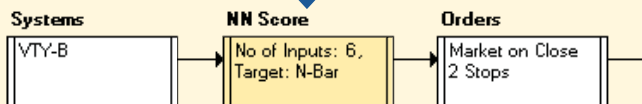

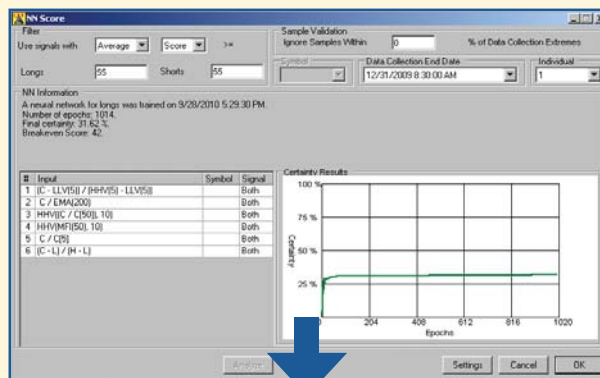

2. Perform Data Mining

We then run a “Data Mining” pass on the Inputs and many bars of price data to find those inputs that have the highest predictability.

3. Train a Neural Network

We then use historical data to train our ARM4 Neural Network component so it learns to find predictive relationships in the data.

At the end of this process, we have an ARM4 Neural Network (NN-Score Component) that can be dropped into ANY Strategy with similar kinds of signals to improve Hit Rate and Profit per Trade.

for Traders

Recent Success

To the right is a good example of how ARM4 improves the profitability of OmniTrader and VisualTrader Strategies.

The T3 Strategy Suite is one of our best non-NSP Strategy collection, generating consistent profits by trading reversal signals.

The first chart shows T3 signals on Google. T3 does a great job of finding potential reversal points, but we can see that the Strategy fired a few unprofitable Long signals in the downturn that began in January.

We trained a Neural Network using inputs that are good at predicting reversals, and applied it to our T3 Strategies. When filtered by **NN Score**, the unprofitable signals were filtered out and the overall profitability of the Strategy improved. With a Score Cutoff of 60, Profit per Trade more than DOUBLED, going from 0.60% to 1.5%. Increasing the score to 70 generated even higher numbers (with fewer trades) as shown in the table to the lower right.

This NN Score component can be “dropped into” any Strategy that has similar signals, such as NSP-41. Additional pre-trained NN Score components are available to members to enhance other kinds of Strategies, such as Chart Patterns.

SPECIAL BONUS:

All new Nirvana Club members, including **Associate members**, will receive the T3 Strategies featured on this page with your Nirvana Club membership (a \$1,495 value), when you join by the deadline.

Double the Profits!

The T3 Strategies find short-term reversal signals.

Add our Pre-Trained Neural Network with Score “Cutoff” set to 60+.

This Network also improved NSP-41, our other “RTM” Strategy. The following table shows Hit Rate and Profit per Trade as Score is increased.

	Score 0+		Score 60+		Score 70+	
Strategy	Hit Rate	Profit/Trade	Hit Rate	Profit/Trade	Hit Rate	Profit/Trade
T3-S1	69%	0.61%	71%	1.30%	65%	2.15%
T3-S2	69%	0.64%	69%	1.85%	100%	8.19%
T3-S3	69%	0.66%	71%	1.14%	77%	3.91%
NSP-41	70%	0.86%	75%	2.15%	81%	6.38%

ARM4 Profitable Strategies

We have been building and refining ARM Strategies for over ten years, and are now at Release 4 (ARM4).

In 2010, the Data Mining improvements we made to ARM4 have led to further performance gains. We now provide over 20 powerful Trading Strategies that consistently generate profitable trading candidates.

Artificial Intelligence on Chart Patterns

Our ARM4 Stocks Strategies demonstrate over 70% accuracy in forward test data. But by far, the most significant advancement on Stocks has been the development of Chart Pattern signals filtered with ARM4. Nirvana Systems has been a pioneer in advanced Chart Pattern Recognition.

The charts to the right illustrate several signals from our ARM4 Trend Line and Support Strategies. We have Networks trained for each pattern discussed in my book, *The 7 Chart Patterns That Consistently Make Money*—some of which are showing Signal Accuracies (hit rates) in excess of 80%.¹

Special Strategies for Futures

For our Futures Level members, we have created ARM4 Strategies based on continuous futures contracts. ARM4 works well on Futures, as Chart Patterns within individual contracts repeat so often. We often see 70% to 80% Signal Accuracies generated by these Strategies. To the right is a recent chart for ARM4 Trendlines on a continuous contract for Gold.

¹ For additional chart examples and statistics from our ARM4 Strategies, see www.nirvanasystems.com/nirvanaclub/ARM4.

THE PLATFORM for the **ULTIMATE** Trading Machine™

**Included
with Your
Membership**

The primary goal of our Nirvana Club research is to create Strategies that can profitably engage the market. But we also need a platform to run the Strategies on.

OmniTrader Professional is the perfect platform for UTM, because it comes with OmniPilot—our advanced automation tool featuring TradeBots.

TradeBots are very easy to use—just list the Strategies you want to run and establish a few simple rules. From there OmniPilot will run the TradeBot to execute the trades and manage your portfolio—automatically!

OmniTrader Professional also has a number of advanced features for Strategy Development, including OmniLanguage—a trading Strategy development language that runs **300 TIMES faster** than TradeStation's Easy Language.

Strategy Automation Made Easy

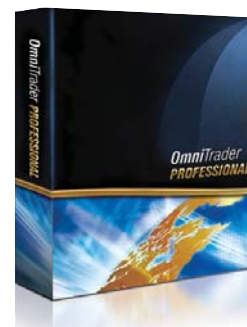

Name	Mode	Days	Start Bot	Start Trade	End Trade	End Bot
<input checked="" type="checkbox"/> EOD_Tra...	EOD	Su-M...	3:30:00 PM	3:30:00 PM	N/A	N/A
<input checked="" type="checkbox"/> TR_Trade...	RT	M-Tu...	8:00:00 AM	8:45:00 AM	2:55:00 PM	3:30:00 PM

1 Specify days to run.

2 Specify Profile, List, and Timeframe for Signals.

3 Push START.

Advanced Software Included! For a limited time, OmniTrader Professional and OmniPilot are included with your Nirvana Club membership. (a \$1,995 value)

RoboCon 2011 For Members Only

We are pleased to announce the next automated trading competition, RoboCon 2011! The last competition we held was a phenomenal success, with members generating APRs over 200% running their mechanical Strategies using OmniPilot.

Prizes and More: Members finishing in the top 3 places earn cash prizes and Nirvana Club product credit. RoboCon 2011 is being scheduled to start February 7, 2011. May the best Strategy win!

The NSP Strategies: Wealth Building Machines

Nirvana Systems Proprietary

NSP Strategies are special products we have been developing for several years. The goal of NSP is to generate consistent, long term gains. So far, the result of this research is two NSP Strategies, NSP-33 and NSP-41.

NSP-33 Trend Follower

NSP-33 was developed to find the most profitable entry points in a developed trend, right in the vicinity of a higher low or lower high. The chart to the right depicts typical NSP-33 signals.

NSP-41 Reversal Trader

NSP-41 is another End-of-Day Stocks Strategy based on the “Reversion to Mean” (RTM) principle. When markets get overbought or deeply oversold, they often return to where they started.

Our research team has spent hundreds of hours studying the RTM principle, and NSP-41 is our best Strategy using it. The chart to the right shows the kind of trades that NSP-41 regularly generates.

When these Strategies are used together in the same OmniTrader profile, they work extremely well. See the opposite page for an equity curve on the combined Strategies.

Nirvana Club Member Access

NSP-33 and NSP-41 Strategies are priced at \$3,000, but they are included in Nirvana Club Stocks and Futures membership levels. Associate members can purchase the NSP Strategies at any time using their Nirvana Club member discount.

NSP-33 Signal on AMLN. This is typical of the kind of signals NSP-33 fires—new moves within an existing trend.

Recent NSP-41 Signals on Ameren. Note how the signals fire on extreme pull-backs, anticipating a reversal.

NSP-33 plus NSP-41—A Winning Combination!

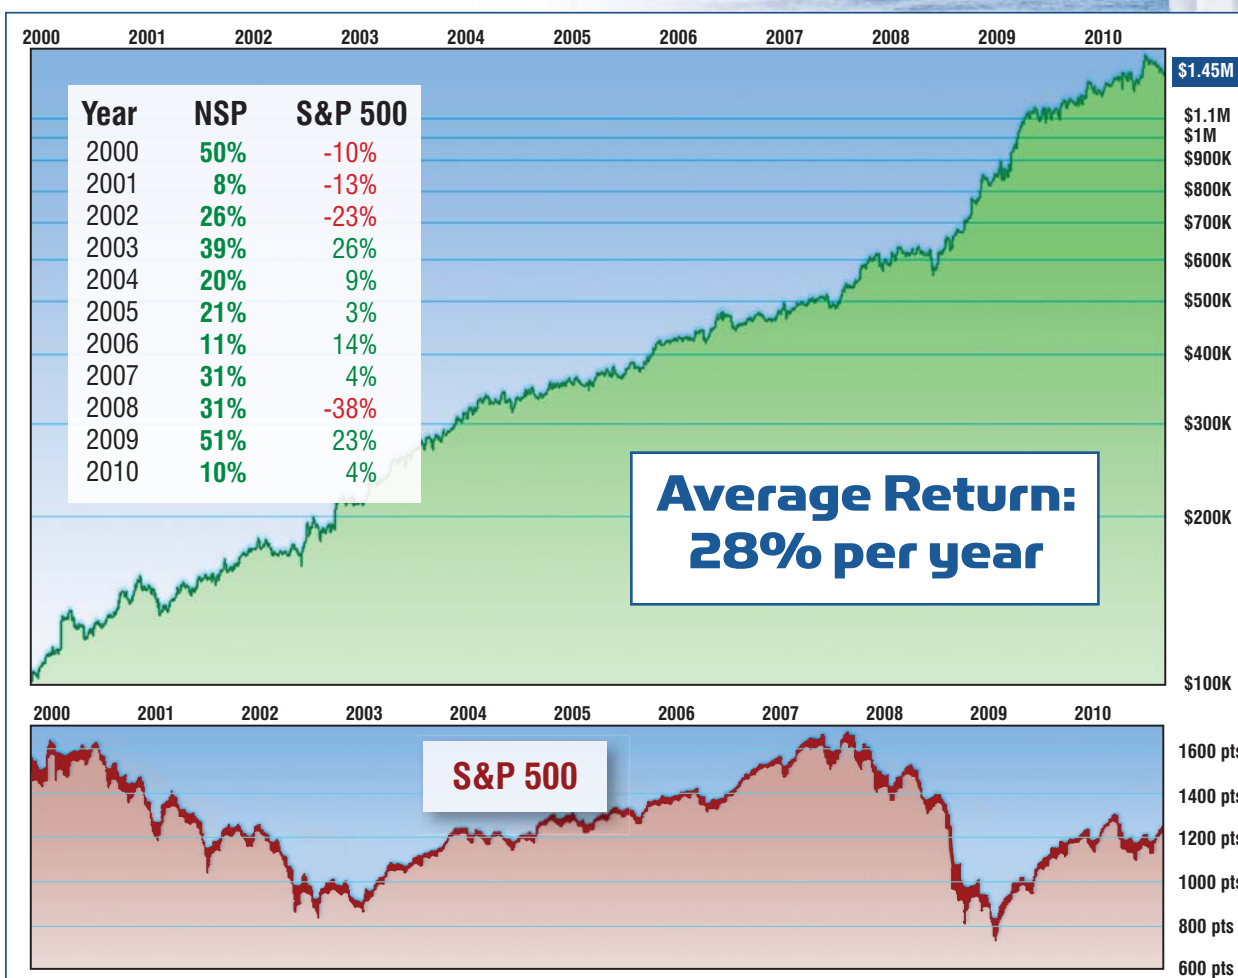

The equity curve performance of NSP-33 and NSP-41 combined over the past eleven years (January 2000 through October 2010) trading all signals generated by the combined Strategies on the S&P 100 list is shown below.

Below the equity curve is a plot showing performance of the S&P 500 during the same time period. Even though the index was down 4 out of 11 years, the NSP Strategies' performance have held up, generating a profit each year.

At Nirvana Systems, we are managing live accounts with this Strategy combination, as are many Club members.

Stocks and Futures Level members have access to the NSP Strategies. Associate members can purchase the NSP Strategies at any time using their Nirvana Club member discount.

Equity Curve for NSP-33 and NSP-41

Member *Benefits*

The Nirvana Club is More Than Just Software.

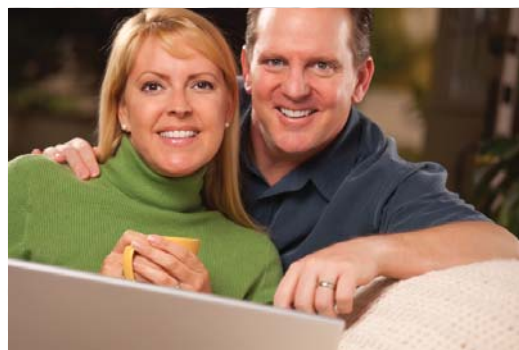

The ARM technology, NSP Strategies and OmniTrader Professional represent giant leaps in automated trading software technology, but they only make up a part of the total benefit that Club members enjoy. There is nothing like the Nirvana Club anywhere in the world!

Advanced Trading System Technology

As a Nirvana Club member, you gain access to the current ARM4 technology. There are different Strategies available, and members choose their level of membership—Associate, Stocks or Futures. After one year, you can continue to receive updates for a nominal annual renewal fee.¹ You will receive OmniTrader Professional with OmniPilot when you join. Stocks and Futures members will also receive our NSP Strategies.

Member Systems and Strategies

Many members are experimenting with the tools to find new, profitable Strategies and Systems. These Strategies are uploaded to the Club Forum and the Back Test and Forward Test results for each Strategy are listed. The best ones are added to our Nirvana Club Member Strategies web page and all members have access to them.

Learn the skills you need to win in the markets with the Nirvana Club Webinar series.

Member Discounts:

Software, including VisualTrader and Plug-ins.....**SAVE 50%**

Educational Seminars.....**SAVE 40%**

Subscription Services, including Real Time Data.....**SAVE 30%**

Club members enjoy generous discounts on all Nirvana products, including software, seminars, and subscriptions.

“ In hindsight, I waited too long before joining the Nirvana Club. As a trader, this has been without any doubt my best trade investment. The friendships, knowledge gained, and sense of belonging have been worth every cent. Do not make my mistake—take the step. You will not regret it. ” — Ric Richardson

Current members receive the latest ARM technology.

¹ See Membership Agreement for complete details.

The *Nirvana Club*

Premier Education

We are here to help you succeed. When you join the Nirvana Club, you don't just get software. You get connected to an elite membership of traders as well as our talented staff. Nirvana hosts webinars to empower you and your trading.

These live webinars allow you to interact with the presenters to get the help you need. The webinars are recorded and archived on the Nirvana Club web site allowing you to view them at your convenience and as many times as you like.

Priority Technical Support

Club memberships help finance our research into the Ultimate Trading Machine goal. For this reason, Nirvana Club members receive preferred status and special privileges. Members receive toll-free access to our Support department, and they receive priority in the support queue. Just say, "I'm a Nirvana Club member."

Nirvana Club Forum

We host the Nirvana Club Directory on our web site. (Members have a choice as to whether their names are listed.) Members' interests are polled, and members can also upload photos and edit their profiles for others to read. We have a savvy group of members from all over the world in the Club. Once you join, you are instantly plugged into this community. The Nirvana Club forums are VERY active, with over 30,000 posts.

The Nirvana Club BASH Event

Each year, we hold a special Nirvana Club seminar, which we call The BASH. This event is FREE for members and their spouses. At the event, we share research results from the prior year, discuss new products, and review tips for trading to help members in their use of ARM and trading in general. The Nirvana Club BASH is attended by Club members from all over the world. It's a great way to meet lifelong trading partners.

“The A.I. tools are as powerful as anything the hedge fund managers have. But, what makes the Club really powerful is the interaction with other members.”

– Steven Mayo

“Visiting Club members and staff at each year's BASH is a definite can't miss event!”

– Jerry Wakeen

Member *Testimonials*

"I have been a member of the Club for 4 years and I sure am glad I joined. Club members are always ready to help each other and as a member, you have the opportunity to participate in the success and development of Nirvana products. You will be rewarded over and over again by the success of the Club Strategies. The money you will make will quickly cover the cost of joining. Join today and find out what you are missing."

- Ken Holmes

"I've been in the Nirvana Club since its inception over 13 years ago. It's been a fun, exciting and fulfilling experience. Fun because of meeting and exchanging ideas with other Club members. Exciting because of receiving new Nirvana products at discounted prices and discovering all the new features Nirvana is developing. And fulfilling because I am using the software to make money in the markets."

- David Olson

"As a member of the Club for a number of years, I have used the forum to interact with other members about trading ideas, and have found the Bash's hands-on training to be invaluable. However, the single most valuable benefit of being a Club member is the ARM technology. Everybody would love to have tomorrow's newspaper today or a crystal ball, but this isn't a reality. Since I don't have access to that, I have the next best thing-ARM. It is the most powerful trading tool I have found. Keep up the great work."

- Heagan Bayles, Jr.

"The Club has provided a place for myself and my peers to communicate and has opened up a whole world of sharing and camaraderie. Because of my many years in the Club, my trading knowledge and success has increased exponentially and I enjoy sharing my knowledge with other members."

- Jerome Sigalow

"Joining the Nirvana Club is the best investment decision I've made to date. Thank you for wonderful products and a support network second to none."

- Keith Buhl

"I find the Nirvana Club to be useful because of the knowledge and talent that this diverse group of members has to offer. There have been countless times that a Club member's forum post has helped me. The Nirvana Club allows you to explore ideas and get input from members from all around the world. The biggest benefit of being a Nirvana Club member to me has been ARM3. Each release continues to show what can be done with the powerful tools and talented team at Nirvana."

- Michael Hicks

"I have been a member for two years. Access to the Club forum and other members' input has helped me become a profitable trader. I used Club exclusive tools to build a Strategy that took second place in Nirvana's first fully automated trading competition. There are Club members doing research on a daily basis and sharing it with the community. I truly believe these Club members are some of the most brilliant minds in the electronic trading community. The original goals Ed Downs set out to achieve are becoming a reality and I am now part of it. This is awesome!"

- Todd Phillips

"I have been a member of the Nirvana family for 2 years. During this time, the many great trading developments issued by my new "family" have propelled me along the learning curve. My development as a trader has gone supersonic as a result of the many things the Club has to offer. I wish I would have joined sooner."

- Jeff McClure

To read more testimonials, see www.nirvanasystems.com/nirvanaclub/testimonials.

The Time to *Join is Now!*

It is difficult to summarize the enormous value of a Nirvana Club membership. There are so many benefits—both tangible and intangible. Members often tell me that joining the Club is the best investment they have ever made.

Members have access to our most powerful trading technology, powered by ARM. They also receive many additional benefits—free Club seminars, discounts on products, priority support, Nirvana Club forums and more. Not to mention the fact that all members participate in the Ultimate Trading Machine mission.

For a limited time, we are offering a new Associate membership level. The Associate membership includes all of the Club benefits listed above. To join the Club as an Associate member, you must submit your application before the November 19th deadline.

Members who join at the Stocks and Futures level get the added benefit of the NSP Strategies discussed on pages 10-11.

This is the opportunity of a lifetime for you to join a group of individuals who are dedicated to our automated trading mission, with a long history of discoveries and successes. Considering the value of all that is included, the membership price is amazingly low.

We'd like you to be a part of this incredible trading club. You will quickly discover that the value of a Nirvana Club membership is unprecedented in the world of trading. Join us today.

Sincerely,

Ed Downs
CEO & Founder
Nirvana Systems, Inc.

Member Benefits

ARM Trading Technology: The most powerful Artificial Intelligence for Traders.*

NSP Strategies: Current Club members get NSP Strategies FREE, including their ARM versions.**

Education: FREE Access to the Club's Online Training Webinar Series.

Community: Network with over 2,700 traders through the private Nirvana Club Directory, Forum and at the annual Club BASH Event.

Member Discounts: Receive discounts on products, including software and subscriptions.*

Free Upgrades: New members are upgraded to OmniTrader Professional with OmniPilot at no charge. Annual OmniTrader upgrades are provided FREE to current Club members.*
